

The system that's changing the system.

(While working within a Microsoft world.)

Compare Nitix with Windows® Small Business Server 2003 Premium Edition

Nitix

Size: Incredibly, less than 40MB

Backup: As often as every 15 minutes
with historical versions of all files
readily available

Disaster Recovery: 2-minutes

Security: Self-configuring, eliminates security
breaches due to human error

Internet Access: Supports multi-line, redundancy
failover and bandwidth sharing

Firewall: Linux-based

Database: Open - MySQL®

Maximum Users: Unlimited

Architecture: Autonomic

Initial Cost: \$ 598 (5 users)
\$ 3,294 (50 users)
\$ 6,244 (100 users)

Microsoft®

Incredibly, more than 4,000MB

Inconvenient and inflexible;
3rd-party solution usually required

Hours to days, even with skilled technician

Difficult to configure, easy to make
a mistake

No support for multi-line, redundancy
failover and bandwidth sharing

Microsoft-based

Proprietary - Microsoft SQL

Limited to 75-users

Monolithic

\$ 1,499 (5 users)
\$ 5,846 (50 users)
No provision for over 75 users
